I just sent a request to Sheryl Lux asking if there is anyone available to visit the site today because I just received a report of dump trucks entering and leaving the site. The most sensitive parcel for wetlands appears to be the one closest to the road PN 0825069012. This is the one that appears to be taking fill per the report that I was given. --P

Hi, Patrick;

I did a bit more research based on some of the other parcel numbers associated with this property. A Critical Areas Designation was done recently for several of these parcels, attached. Also a Boundary Line Adjustment was recently completed for four of these parcels.

Nick Gillen of DPER was the environmental scientist on these properties; perhaps you two should talk about what Nick has seen on the site (206-477-0301).

Jeri Breazeal, DPER Code Enforcement Officer had a case on parcel 082506-9013 for grading in critical areas; I think it turned out to be gravelling existing roads. Jeri can be reached at 206-477-0294.

Then let us know if we should turn this in to Code Enforcement.

Yes, it seems that would be a good idea. Thank you. -- Patrick

OK. Do you want a complaint filed with Code Enforcement?

Hi Laura,

Thanks for your help on the parcel # 082506-9012. Erik suggested that it was OK to forward this on to you and wanted me to send this information. I will continue to look at it from my end but it seems like your office should at least be aware of this citizen's concern. -- Patrick

Patrick, do you know anything about "Gunshy Manor" in the Evans Creek watershed? You can see photos at the link below. Please **do not** distribute this email. This may become something... thanks, Erik

Josh/Erik/Bob:

Here are the materials I emailed about yesterday. Please let me or Tom Young know if you need legal assistance from us in reviewing the allegations of wetlands impacts without permits.
